Vitaly Zaslavsky Karelia, Russia

Summary

I have Linux on all my home and job devices. When the chef gave me a MacBook I asked him can I install Linux on it. He said "No" and gave me HP. I'm not a Linux-maniac. But for me, it's the most comfortable OS.

Love everything about DevOps, automatization and stability. I have a passion for everything I do. Have sufficient experience in Docker and good expertise in Kubernetes, Helm and Terraform. I can (and do) wrap everything in a container. Even if it's a GUI application. (Sometimes it's easier to use Docker than resolve dependencies issues)

I love to create a local development process for Backend developers (as a Backend developer in the past) as comfortable as possible from the very start. And this is my strong side: I can debug applications, find issues and create Pull Requests with changes right in application code.

I have experience in Scrum and Kanban methodologies. Can track time and move cards in the right columns. Sometimes I can annoy a little when trying to clarify every little thing related to my task or current workflow.

Have good relations with employees. I really like peaceful holywars with colleagues, discussing some technical stuff and approaches. Love to work in a team and share my knowledge with others and gain wisdom from more experienced people.

I have no bad habits (except programming in free time). I don't smoke and don't have morning headaches after drinking (because I don't drink to drunk)

Languages

- **Russian** Native
- **English** Conversational (B1; Thanks YouTube)

Personal Life a little about

Some of my current hobbies:

- Music. Guitar and Piano playing. Singing sometimes. And (of course) listening. Graduated from music school class classical guitar;
- Blogging about everything. Not only about work;
- Programming. Yes, even after work. Currently, actively use Go and JavaScript to automate some things. Currently, fell in love with Rust

I'm a happy husband of my beloved wife for 5.6 years. She really helps me in my path of life emotionally and physically as a family hearth keeper.

We love animals. We have the black panthera-like cat Json (this word always sounds like a name for me) and little sweetie girl Pixel (Pixie for short). Also, we love foxes so much. That's why my logo and background with fox face

DevOps Engineer — Novakid Inc March 2022 - Present

Primary projects: ⭐ Novakid

Industries: English learning platform, Teaching, Online Education

DevOps Engineer — ScienceSoft November 2020 - March 2022

Primary projects: Linxio, Ultravioletsim, FairMoney

Industries: Logistics, IoT, FinTech

IaC: Terraform, Terragrunt (+ tflint, tfsec, terrascan), Kubernetes, Helm, Docker (+ hadolint, docker-compose), Kaniko, DroneCI

AWS:

Analytics:
- OpenSearch (Elasticsearch)

Application Integration:
- EventBridge
- Amazon MQ (RabbitMQ)
- SNS
- SQS

Business Applications:
- SES

Compute:
- EC2, EBS, EIP, ALB/NLB, ASG
- Lambda (Go)

Containers:
- ECS (EC2 and Fargate based; with intelligent autoscaling)
- EKS
- ECR

Database:
- RDS
- ElastiCache
- DynamoDB (not a lot)

Developer Tools:
- CodePipeline
- CodeBuild
- CodeCommit

Management & Governance:
- CloudTrail
- CloudWatch (Logs, Metrics)
- SSM (Session Manager, Patch Manager, Parameter Store, Run Command)

Networking & Content Delivery:
- Cloud Map
- Route53

- 🔷 VPC + Security Groups
- 🔷 ALB/NLB

🛡️ **Security, Identity, & Compliance:**

- 🔲 ACM
- 🔲 Cognito
- 🔲 IAM
- 🔲 KMS
- 🔲 Secrets Manager

📄 **Storage:**

- 🟩 EFS
- 🟩 S3
- 🟩 EBS

Monitoring:	CloudWatch, DataDog
Tools:	Nginx, RabbitMQ, Redis, PostgreSQL, MySQL, ElasticSearch, ArgoCD
Work Flow:	Jira, Confluence, Kanban, Bitbucket, GitHub
Extra:	**Languages:** Go, JavaScript, Bash, Rust **CLI:** Git, Just, Makefile, Sops, AWS CLI, aws-vault, Restic, Gomplate

DevOps Engineer — Axmit November 2019 - October 2020

Petrozavodsk, Republic of Karelia

DevOps:	Kubernetes, Helm, Docker, Docker-Compose, Kaniko, GitLab-CI (CI/CD) (sincere love for to of them)
Cloud Platforms:	DigitalOcean, GCP, AWS, Scaleway
Monitoring:	ELK Stack, Prometheus & Grafana
Tools:	Nginx, Jsonnet, RabbitMQ, Redis, PostgreSQL, MySQL, S3
Linux:	SSH, Bash, Makefile, Git
Work Flow:	Youtrack, Confluence, Kanban, GitFlow
Extra:	Ansible, Jenkins, Python, Go (Just a smidge)

Middle PHP-developer — Axmit October 2018 - October 2019

Petrozavodsk, Republic of Karelia

Primary Project:	🔷 Zelos
Dev Tools:	Laravel, Symphony Components, Composer, OAuth (Social Network), JWT, PostgreSQL, Nginx
Code Quality:	Codeception, CodeSniffer, PHP-CS-FIXER, PSR-2, PSR-12
Work Flow:	Youtrack, Confluence, Scrum, GitFlow
Linux:	SSH, Bash, Makefile, Git
DevOps:	Docker, Docker-Compose, GitLab-CI (CI/CD), Kubernetes, Selenium (As side skills)

Full Stack Web Developer — Molticlub August 2016 - October 2018

Saint Petersburg (remote)

Primary Project:	🔷 Molticlub
Backend:	PHP7.x, Yii2 & Extensions, Symphony Components, Composer
Code Quality:	Codeception & Behat & Selenium, CodeSniffer, PSR-2
Frontend:	ReactJS & Redux & Saga & React-Router, Bootstrap, Webpack, Gulp, Sass, BEM, ESLint
Infrastructure:	MySQL, Apache2, RabbitMQ, WebsocketD
Linux:	SSH, Bash, Makefile, Git

DevOps: Vagrant, Docker, Docker-Compose, Bitbucket-Pipelines

House Painter — ACS November 2014 - July 2016

Videl, Republic of Karelia

Primary Project: Videl Boarding House

Backend: Knauf Rotband, Primer

Frontend: Weber Vetonit, Emulsion Paint, Enamel Paint

Extra: Cleaning of Premises, Garbage Removal, Wall Crushing

Full Stack Web Developer — Macropod June 2013 - August 2014

Saint Petersburg

Backend: PHP5.x (pure), Apache2, MySQL, PHPMyAdmin

Frontend: CSS3 (pure), HTML, jQuery & Plugins

Professional Skills Skills Grid

All ratings of skills are super subjective. To learn more about my experience contact me with any available way (Telegram is better).
